# FTP連線設定

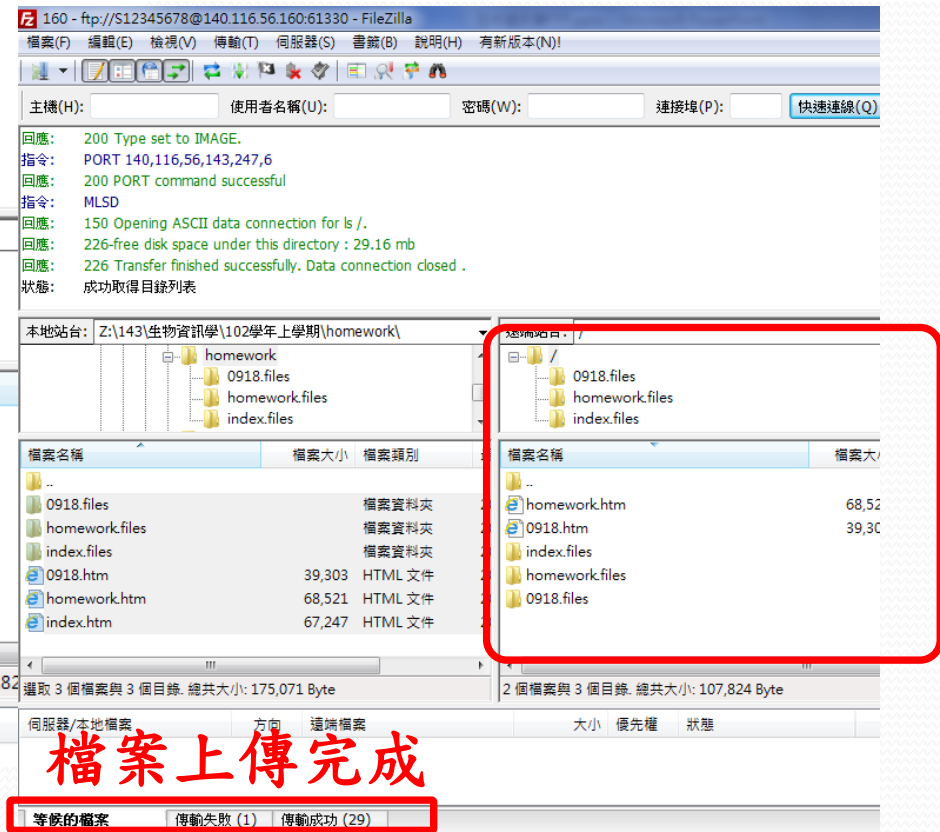

預設20秒  
把秒數改多一點

# FTP上傳

1. 選擇檔案，按右鍵“上傳”。

2. 檔案上傳成功。

# FTP上傳

The screenshot shows the FileZilla FTP client interface. The main window title is "新站台 - ftp://S12345678@140.116.6.160:61330 - FileZilla". The menu bar includes 檔案(F), 編輯(E), 檢視(V), 傳輸(T), 伺服器(S), 書籤(B), and 說明(H). The toolbar contains various icons for file operations. The status bar shows "主機(H):", "使用者名稱(U):", "密碼(W):", "連接埠(P):", and "快速".

A dialog box titled "目標檔案已經存在" (Target file already exists) is open, showing the source file "D:\生物資訊學\homework\homework.htm" (38,092 Byte, 2012/9/18 上午 10:51:54) and the target file "/homework.htm" (38,092 Byte, 2012/9/18 上午 10:56:29). The dialog offers several actions:

- 覆寫(O)
- 如果來源較新就覆寫(I)
- 如果大小不同就覆寫(D)
- 如果大小不同或來源較新就覆寫(Z)
- 續傳(R)
- 更名(N)
- 略過(S)

Additional options include:

- 總是使用這個動作(A)
- 只套用到目前的佇列(C)
- 只套用到上傳(P)

Buttons for "確認" (OK) and "取消" (Cancel) are at the bottom of the dialog.

In the main FileZilla window, the local site path is "D:\生物資訊學". The file list shows folders like "歷屆", "生物", "h", and "站存", and files like "index.files", "homework.files", "index.htm", and "homework.htm". The "homework.htm" file is selected, and its details are shown in the bottom right pane:

檔案名稱	檔案大小	檔案類別	最後
..			
homework.files		檔案資料夾	2012
index.files		檔案資料夾	2012
homework.htm	38,092	HTML 文件	2012
index.htm	34,422	HTML 文件	2012

A red arrow points from the text "相同檔名 可選擇覆蓋" (Same filename, can choose to overwrite) to the "homework.htm" file in the local site list.
